DANIEL SALAMON

Front-End Developer

INTRODUCTION

HI,

I'm Daniel, father, mentor, and a passion-driven Javascript ninja. My interest in the IT field started with writing small scripts for games also I wrote my first PHP site when I was 15. In secondary school, we got intensive IT education in different fields moreover I fell in love with web technologies. It became my hobby and main interest, later my university major then career. Currently, I'm responsible for the web module in Codecool.

For me playing with new technologies, small gadgets, like Raspberry Pi is an excellent way to expand my knowledge. Also, I'm that guy who writes scripts to every repetitive task. When I close my laptop, I like to go out to travel and discover new places with my family.

HARD SKILLS

Skill	Level
Javascript	●●●●●●●●●●
TypeScript	●●●●●●●○○●
Python	●●●●●●○○●●
Node.js	●●●●○○○●●●
CSS	●●●●●●●●○●
Node.js	●●●●●●●○●●
Angular.js	●●●●●●●○○●
Angular 2+	●●●●●●○○○●
Client performance	●●●●●○○○○●
Testing	●●●●●○○○○○
Docker	●●●●○○○○○●
Unix	●●●○○○○○○●
AWS	●●●●○○○○○●

SOFT SKILLS

Having deep knowledge of some languages and frameworks is not enough to effectively work with others. I always found myself **motivated** to help peers and use my **creative** self to boost the business. While practicing the Project Manager role, I focused on the enterprise side of projects, **organizing** the cost and efficiency of the team. In the Aporta team, I learned how to stay **proactive** remotely and why is it important to practice honest and ambitious **communication**. As a mentor, I do **coaching** every day to help our students and teach them how to **solve** problems.

EDUCATION

2006 - 2011 | JEDLIK ÁNYOS SECONDARY SCHOOL
Graduation and 3 OKJ (vocational diploma) in
Software Developer, Multimedia Developer & Network Operations
Győr, Hungary

2012 - 2015 | ERHVERVSAKADEMI SYDVEST
Computer Science
Esbjerg, Denmark

With best regards,
